Skills

Git

GitHub

GitLab

JavaScript

TypeScript

React

React Native

Expo

Node Js

Python

DjangoRestFramework

Firebase (Storage & Authentication)

I am a software developer specializing in web and cross platform mobile development. I having worked with a number of web technologies with from client side to backend. I have worked with Python's Django and Django-Rest frameworks on the backend and the React library for client side. I am constantly learning more on these technologies as I interact with them. I am able to effectively self-manage on independent projects, as well as collaborate as part of a productive team.

Education

B.Sc. Computer Science, Kenyatta University, Thika

November 2020 – Present

I am a student at Kenyatta University where I am currently undertaking a bachelor's degree in Computer Science.

Employment History

Country Quiz

A web-based country guessing game. Created in JavaScript, React Function based components and CSS, the app consumes data from the restcountries.com API. The data is cached in the browser's local-storage for easy access and to minimize API calls. While the API has no specified limits on the number of calls, I found this efficient enough. A player is then required to guess the capital city of a given country or provided with the
